1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kimura et al. (U.S. 6,413,620 B1).

The reference teaches a mixture of borosilicate silicate glass and spinel ($MgAl_2O_4$) used in a circuit board (col. 6, lines 35-40). The instant invention claims various phrases that are crystallized when this mixture is sintered as taught in Kimura et al. It would have been obvious to one of ordinary skill in the art that such phases would precipitate giving the starting glass and spinel mixture.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 703-308-2420. The examiner works an increased flex time schedule, but can normally be reached Monday through Friday, 11:30 A.M. through 8:00 P.M. Eastern Time. The examiner returns all calls within one business day unless an extended absence is noted on his voice mail greeting.
